Dear SCBA,

1. Reference your circular dated 22.06.2024, regarding suggestions on 'Comprehensive Reforms for SCBA'
2. The suggestions are as under:
 - a. Advocates Joining Post Retirement.

Advocates who join practice, post their retirement from Govt service, form a distinct Class. Their strengths comprise lived experience of life, including in myriad shades of Administration and Public dealing, maturity, acuity of Judgement, Analytical powers, desire for public service due to a higher sense of giving-back- to- society. Higher motivation and zest for , lesser social and personal commitments, Change Agents in a monochromatic professional environment-fresh thinking

This class, therefore becomes a sharp tool for preferred deployment, to assist in the speedy and prompt administration of justice. They just need a Head-Start, for optimum utilisation of their strengths. Head-Start could comprise organised arrangements, at higher and intense exposure to litigation, convergence of domain speciality and appropriate litigation synergy, appropriate Work Space,

b. Grooming Young Lawyers

Young Advocates are a permanent feature in the SC. They come from diverse social and educational backgrounds. They need to be groomed in conduct, ethics, professionalism, positive and progressive attitude in and out of the Court. We are talking about Institution building. Reserve Work, for New Comers/ Young Lawyers. A dedicated team of well groomed lawyers can take up, this voluntary task.

C. Deployment of Legal AI Labs

Legal work has to grow and proliferate in a fast changing AI eco system. At the moment, bulk of the lawyers lack the motivation, expertise and facility to get well versed in the fast evolving AI and associated technology. We need to give a functional interface to the not so young lawyers, and proper training to the young lawyers, to harness this Force Multiplier technology. Four Legal AI Labs, need to be deployed for free training and assistance.

Best Wishes
